

COVID-19 UPDATE #31 – VIC survey on COVID-19 impacts on the WARR sector

In light of the evolving coronavirus situation and a range of other seasonal pressures, the Department of Environment, Land, Water and Planning (DELWP) has reinstated a weekly survey of the waste, recycling and resource recovery sector (including local government).

The survey will take approximately four (4) minutes to complete and responses will be de-identified. This week's survey, which can be found [here](#), will stay open until Monday, 1 August 2022.

Survey responses will be used to help the government better understand current impacts of COVID-19, including other seasonal factors, and to inform potential sector support.

Any queries regarding the survey can be directed to waste.emergency@delwp.vic.gov.au
